Investor Showcase – March 2017

Technology & Digital services provider RXP Services Limited (ASX: RXP) will present its ‘Investor Showcase’ in Melbourne today and will also host an ‘Investor Showcase’ event in Sydney on Monday 3 April.

Our digital future

The Melbourne Showcase event will be held in RXP’s new ‘Experience Hub’, which opened in January this year. The Experience Hub enhances RXP’s ability to provide an innovative, user-friendly environment for its clients based on the company’s ‘design thinking capabilities’.

In a rapidly evolving market place, where technology is continuing to play an ever-increasing role in business and in our lives, the Investor Showcase is a forum to demonstrate how RXP is making a difference to its clients. This year’s Investor Showcase has a particular focus on the digital evolution, and how RXP has been able to adapt and grow with the pervasive digital trends being experienced in the market, and how it is positioned for further growth.

Commenting on the investor showcase and ongoing growth in digital, Ross Fielding, CEO of RXP Services, said:

“The RXP ‘Experience Hub’ has been up and running since the start of this year and has already delivered some fantastic results for our clients. It’s great to be able to give investors a little more of an insight into how we leverage the Experience Hub and how we are evolving our business to meet the growing demand for digital services.

“Our digital offering means we have not only been able to maintain all of our key client relationships, but we have also further deepened them. Pleasingly, our evolved capabilities combined with our reputation for service excellence, has also resulted in winning work with new clients. This has contributed to ongoing growth in the business, with revenue growth for the full year expected to be at the top end of the +10-15% guidance and an EBITDA margin of 13-14%. The outlook for FY18 is similarly positive, with revenue growth again expected to be in the range of 10-15% with an EBITDA margin of 13-14%.”
